

ABSTRACT OF THE DISCLOSURE

A picked-up image managing device comprises a
picked-up image memory which stores items of picked-up
image data and items of image picking-up position data
5 associated with the items of picked-up image data, a
grouping circuit which classifies the items of picked-
up image data stored in the picked-up image memory into
a group, and a group name determining circuit which
determines a group name of the group based on the items
10 of image picking-up position data associated with the
items of picked-up image data of the group.
